

## Homework 3 - Grading Guidelines

Total points: 10

1. **4 points** for the index entries to the words mentioned in the assignment instructions for unigrams.
2. **4 points** for the index entries to the words mentioned in the assignment instructions for bigrams.
3. **0.5 point** for the log file generated from running the job on the fulldata for unigrams and devdata for bigrams on GCP.
4. **1 point** for the inverted index file generated of the document "5722018484.txt".  
(Run a separate job with only this document as input).
5. **0.5 point** for a screenshot of the output folder for the job for both unigrams and bigrams. The output folder is what you specify as the second argument while running the job and will contain all the intermediate files (before merging) after running your map reduce program.
6. Also remember to submit your JAVA Code for unigrams and bigrams both.
